EDUCATION

Degree	Specialization	Institute	Year	CPI
B.Tech	*Computer Science & Engineering(AI&ML)*	GVP College Of Engineering For Women	2022-Present	8.68
HSC BIEAP	*Physics, Chemistry, & Mathematics*	Aditya Junior College	2020	83
SSC AP	-	Aditya School	2019	9.2

Experience

Coding Raja Technologies *Apr 2024 – May2024, virtual*
Machine Learning Intern
• Developed a **sentiment analysis model** for social media posts and an image classification system to identify different food items using Python libraries such as **NLTK, Scikit-learn, and TensorFlow**. Performed data preprocessing, feature extraction, and model training to accurately classify sentiments and recognize food categories. **Evaluated performance** using accuracy and F1-score, optimized model parameters, and documented results to support data-driven decision-making in real-world applications.

EXCEL R *May 2024 – Jul2024, virtual*
Data Science / Machine Learning Intern
• Developed an end-to-end machine learning pipeline to detect fraudulent credit card transactions using real-world, highly imbalanced datasets. **Performed data preprocessing, EDA, and feature engineering** to uncover transaction patterns, anomalies, and fraud-related correlations. Implemented and optimized multiple ML algorithms, including **Logistic Regression, Random Forest, Decision Trees, XGBoost, and SVM**, using cross-validation and hyperparameter tuning. Built a high-recall fraud prediction model to minimize false negatives and significantly improve fraud detection accuracy for enhanced financial security.

PROJECTS

Diabetes Prediction System
•Built a Streamlit application to predict diabetes using patient data, featuring an interactive user interface and real-time predictions to enhance accessibility and user experience for health monitoring. The solution was developed using **Python, Pandas, Scikit-learn, and Streamlit,** integrating data preprocessing and model optimization techniques. Achieved an accuracy of **85%** with **a Random Forest classifier** trained on the PIMA dataset, following extensive hyperparameter tuning to improve model performance, reliability, and practical usability.

IPL Score Predictor
• Developed a Regression model **to predict first-innings IPL scores** using dynamic inputs such as teams, venue, overs, and player data, enabling more accurate match forecasting with real-time predictions. The solution was built using **Python, Spark, Random Forest, and Streamlit,** integrating feature engineering and model optimization techniques. Achieved an **82%** prediction accuracy by leveraging dynamic inputs and implementing live input simulation, resulting in realistic match scenarios and improved reliability of score forecasting.

TECHNICAL SKILLS

Programming Languages: C, Python, Java, SQL
Developer Tool: Git & GitHub, VS ssssCode
Soft Skills: Time Management, Communication, Problem Solving, Teamwork, Work Ethics
Areas of Interest:AI, ML, Data Science, NLP, Canva Designing

POSITION OF RESPONSIBILITY

Social Media Handler - Aimers Club, GVPCEW
Member - Student Innovators, Aimers Club, GVPCEW

CERTFICATIONS/ACHIEVEMENTS

NPTEL Certifications : “Problem Solving through C Programming” , “ Programming in Java” , “Cloud Computing”.
• Secured **1st** place in the Machine Learning Hackathon, GVPCEW.
• Secured **3rd** Place in Essay Writing competition, GVPCEW.
